# Information for your patients

# Helping you to support patients with sight loss

Whether your patients have a diagnosed eye condition or are struggling with their vision pre-diagnosis, we can help you to support them.

We offer practical and emotional support to anyone affected by sight loss, including families and carers.

# Ways you can help

You can:

- Show empathy and be clear about where they can get more information.
- Complete a simple and secure online referral form (rnib.in/ReferalServicesForm) to give your patients access to immediate help and guidance from skilled representatives at RNIB.
- Share our free resources below about eye conditions and the support available with your patients who are affected.

### **Patient information booklets**

Our series of resource guides cover a range of eye conditions, advice about benefits, emotional support, plus advice and tips on day to day living.

Below is a selection of our most popular editions. They are available to download and to order in print, audio and braille. Why not download or order them for your practice to have them immediately to hand?

### How we can help

At RNIB, we recognise everyone's unique experience of sight loss and offer help and support – this can be anything from practical and emotional support, campaigning for change, Talking Books and the products we offer in our online shop. Find out more about the services we offer people with sight loss, how to get in touch and other sources of information.
